LAM-503

Automatic B2 Laminator

Made in Europe

High Speed Lamination

Chrome Roller with high pressure to ensure perfect results all the time

Auto Feeder with top suction through suction cups (like offset press)

5.7" Touch Screen Control

Bursting (separating) unit with perforator

Decurling device for flat sheet output

Technical Description

- Fully Automated Lamination
- 5.7" touch screen for machine operation
- Stream Feeder with Suction Cups
- Hard Chrome heating cylinder with
- 230mm diameter
- Three Zone Heating System
- Decurling Device
- Perforating device to assist bursting
- Bursting rollers with automatic control and substrate thickness adjustment
- Airshaft for laminating roll
- Delivery table adjustable in height and angle
- PID temperature control
- International and reknown electrical components
- Optional Jogger available
- Optional Automatic Stacker

Installation Requirements

Power Requirement

Installed: 7.5 kW 400V – 3F+N+E

Compr. Air Consumption: 120 L/min 5 bar

Weight: 950 kg

Overall Dimensions 1100 x 2900 x 1600mm

Specifications

Pressing Force:	23kN
Max sheet size:	520 x 720 mm
Paper thickness:	110 - 600 gsm
Speed:	30 m/min
